

U. S. Branch Mint,

New Orleans June 26. 1867

Dear Sir,

In my letter to the Director of the Mint on the condition of this Branch Mint, I took the liberty to suggest that the difficulties likely to be encountered in the manufacture of the nickel-copper coins, might be best obviated by allowing me to go to Philadelphia to observe and study the management of this alloy as practiced in the U. S. Mint. -

Having received instructions from the Lighthouse Board to turn over the office of L. H. Engineer to Genl. M. D. McAlester on the 1st. prox^o, by which time I shall also have completed the duties assigned me by the Supervising Architect of the Treasury Dept., I beg leave to request you to mention ^{these facts} in your correspondence with the Secretary of the Treasury, - with such recommendations in regard to my application for leave of absence as you may deem proper.

John Jay Knox Esq,
Ass^t Comptroller of the Currency.

Very Respectfully
Yours O^b. Serv^t.

Chas. F. Bonzano
Special Asst. Treas. Dept.

RG104 entry 217 box 2

Branch Mint of the United States
New Orleans
June 26, 1867

Hon. John Jay Knox
Assistant Comptroller of the Currency

Sir:

In my letter to the Director of the Mint on the condition of this Branch Mint, I took the liberty to suggest that the difficulties likely to be encountered in the manufacture of the nickel-copper coins, might be best obviated by allowing me to go to Philadelphia to observe and study the management of this alloy as practiced in the U.S. Mint.

Having received instructions from the Lighthouse Board to turn over the office of L. H. Engineer to Genl. M. D. McAlister on the 1st prox., by which time I shall also have completed the duties assigned me by the Supervising Architect of the Treasury Dept., I beg leave to request you to mention these facts in your correspondence with the Secretary of the Treasury, with such recommendations in regard to my application for leave of absence as you may deem proper.

Very respectfully,
HM. F. Bonzano
Special Agent, Treasury Dept.
